JOSH APP GUIDE

AI X OS

# Home Screen

Tap your profile picture to switch between different properties, adjust settings, and access your chat history.

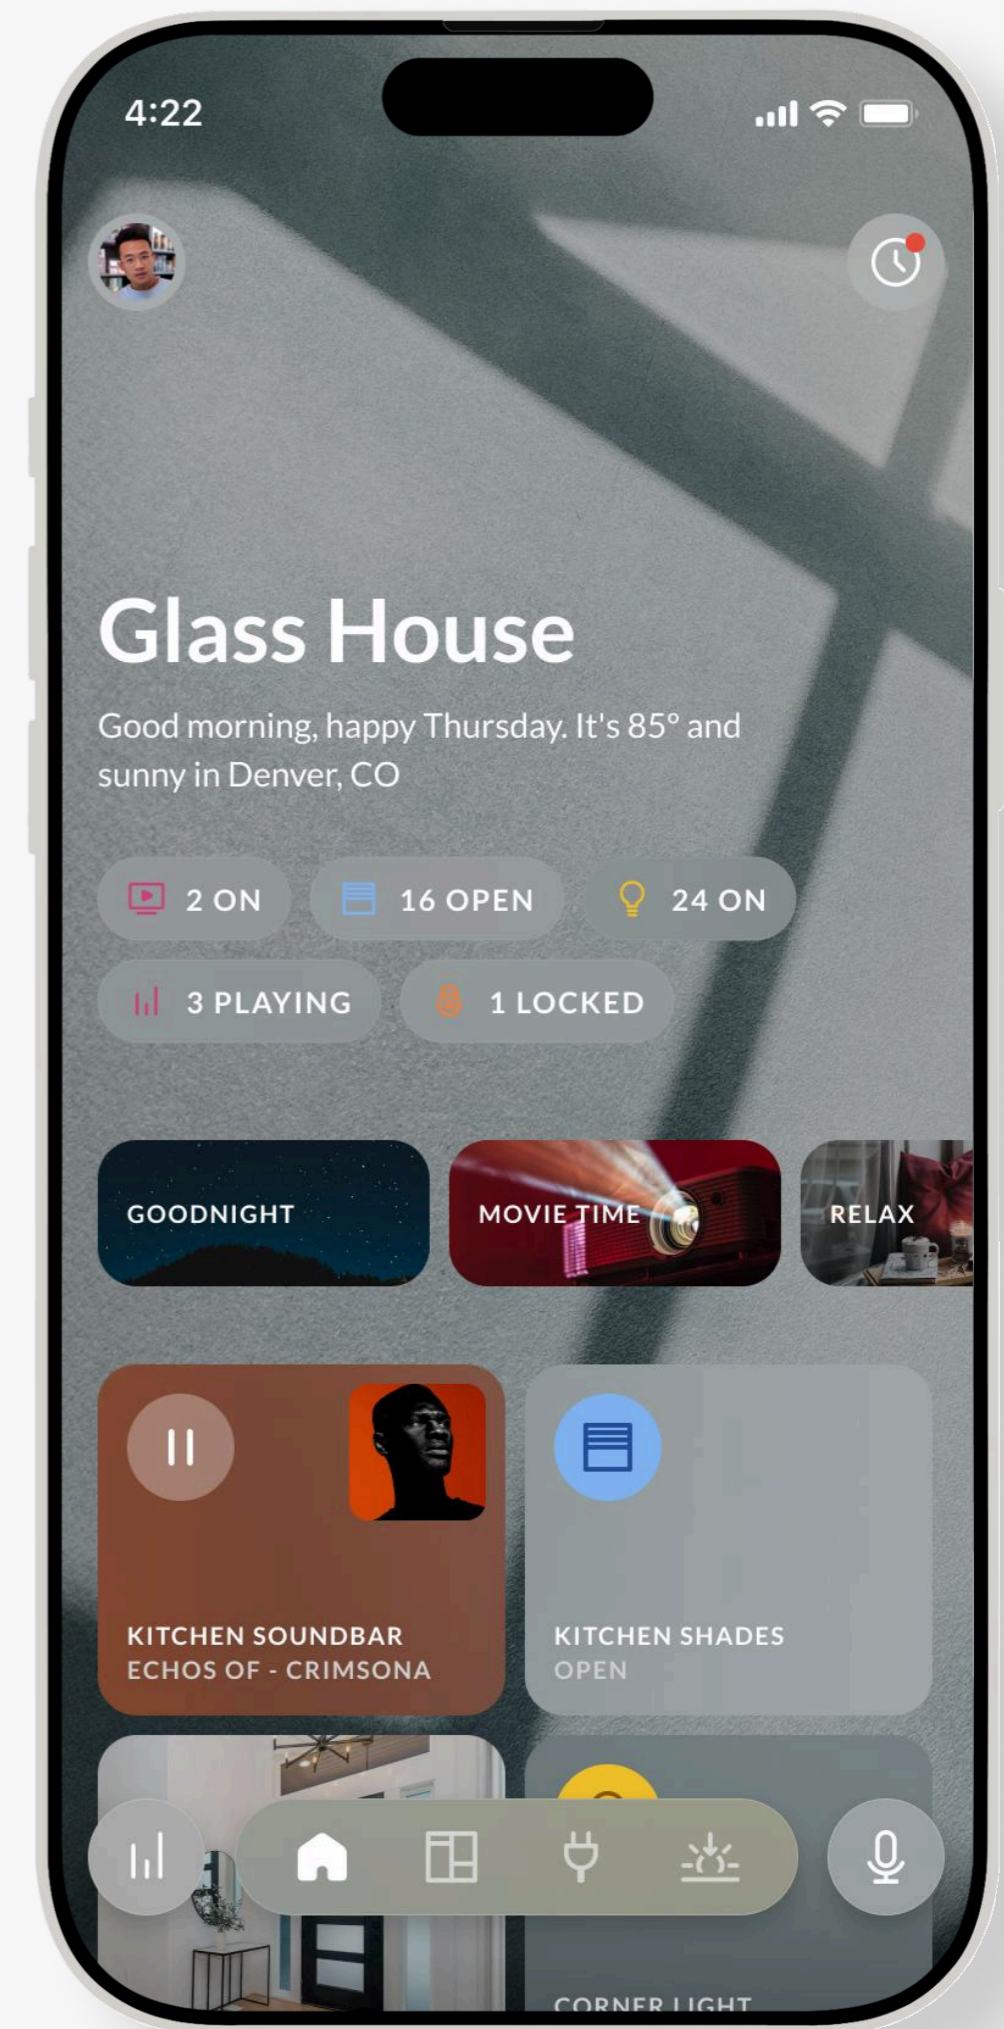

Customize your home screen with a background photo and the name of your home.

See which devices are active in your home and access them instantly.

Tune into the Active Media Hub to the left of the Navigation Bar to adjust active music and video.

Toggle the Navigation Bar to view your Home Page, Areas, Devices, and Scenes.

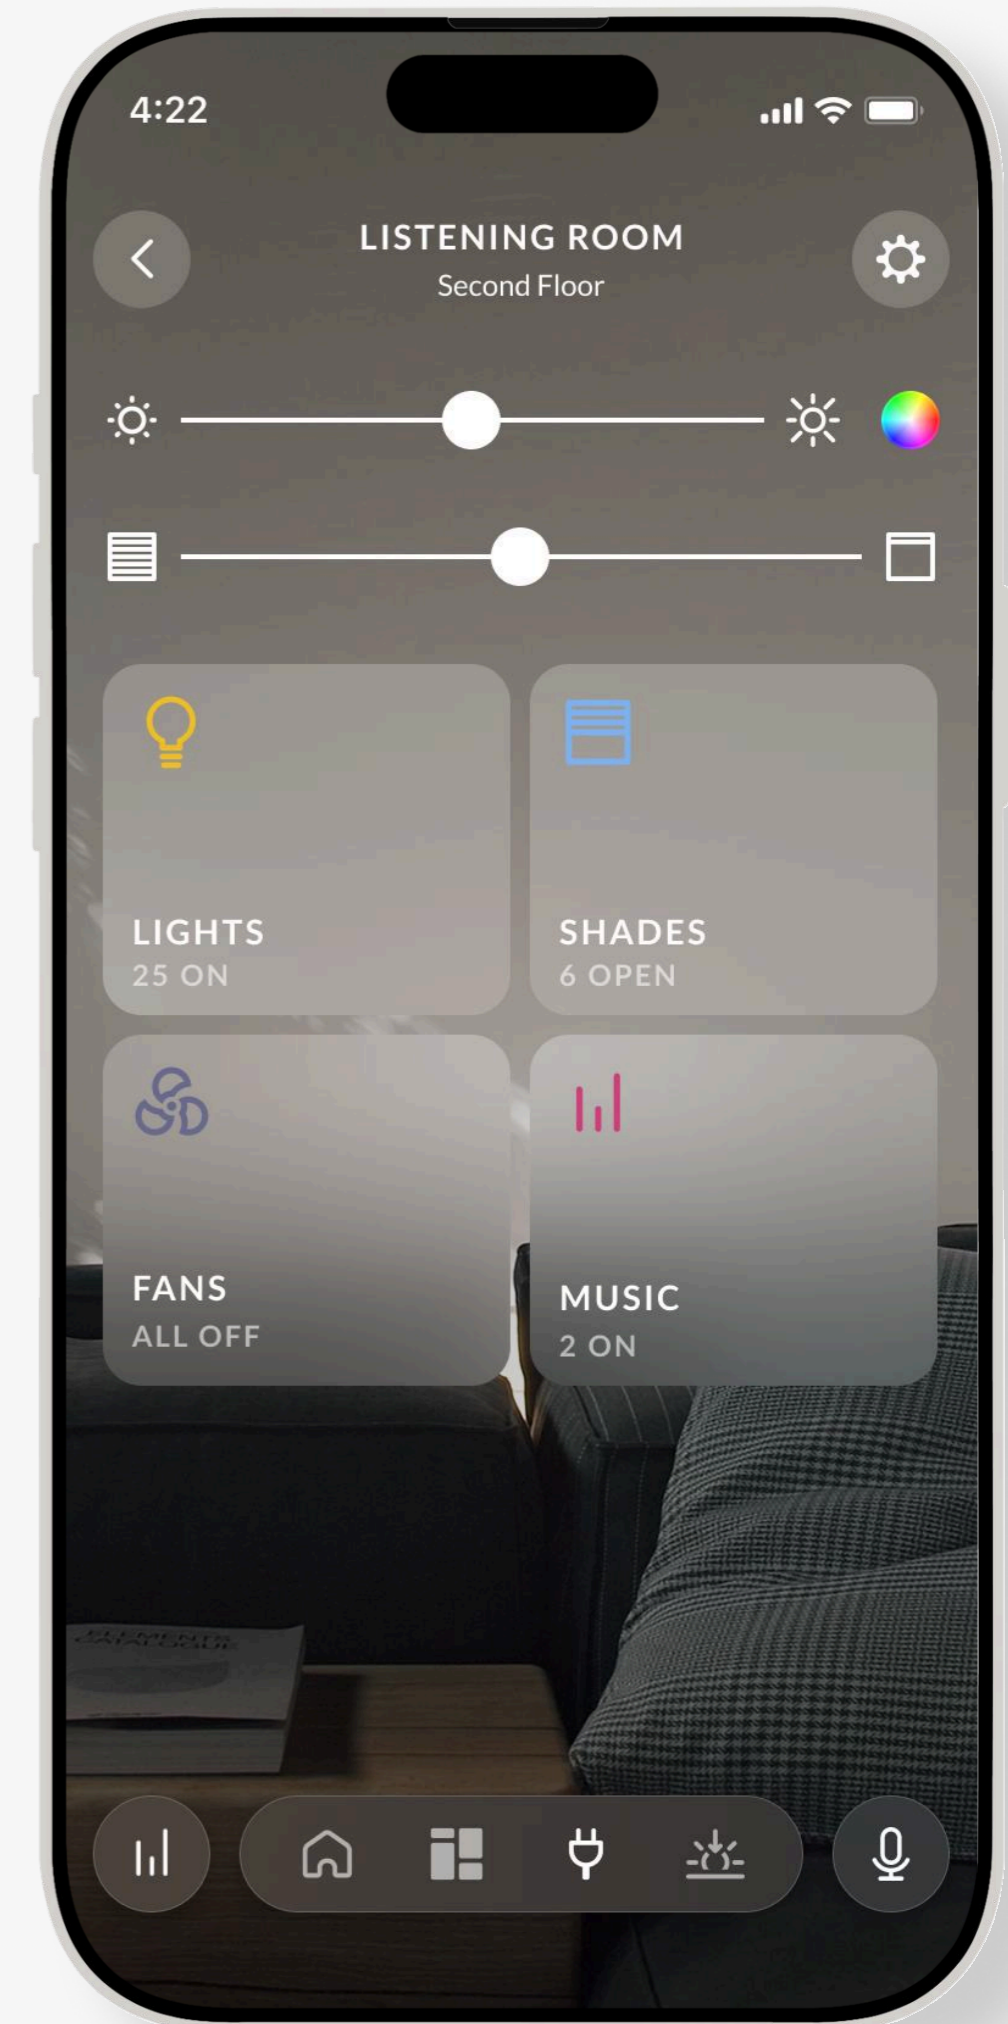

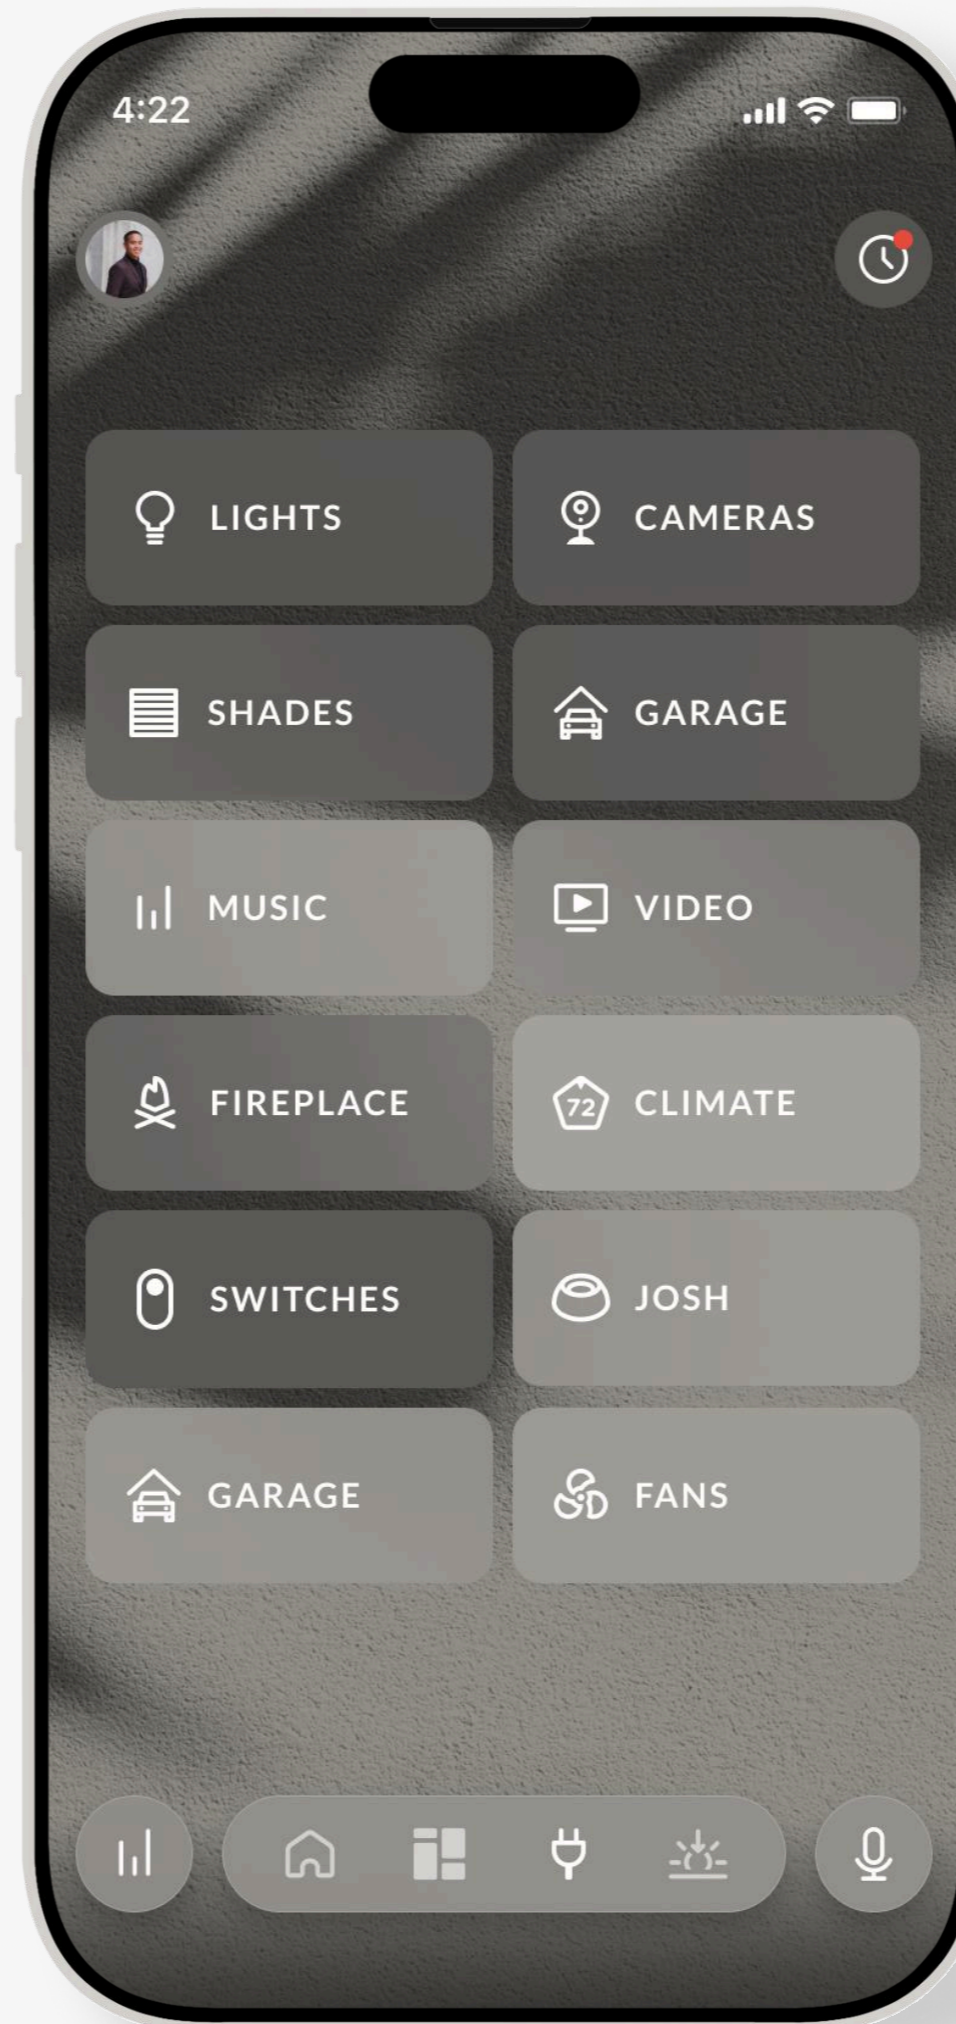

Tap the Microphone Icon to the right of the Navigation Bar to give a voice command or long press to type a request.

# AI X OS Devices

Tap the **Devices Tab** to access all of your connected devices by category. Grouped views give you control of every device across your property.

Select any device category to control by room, and access individual devices as well.

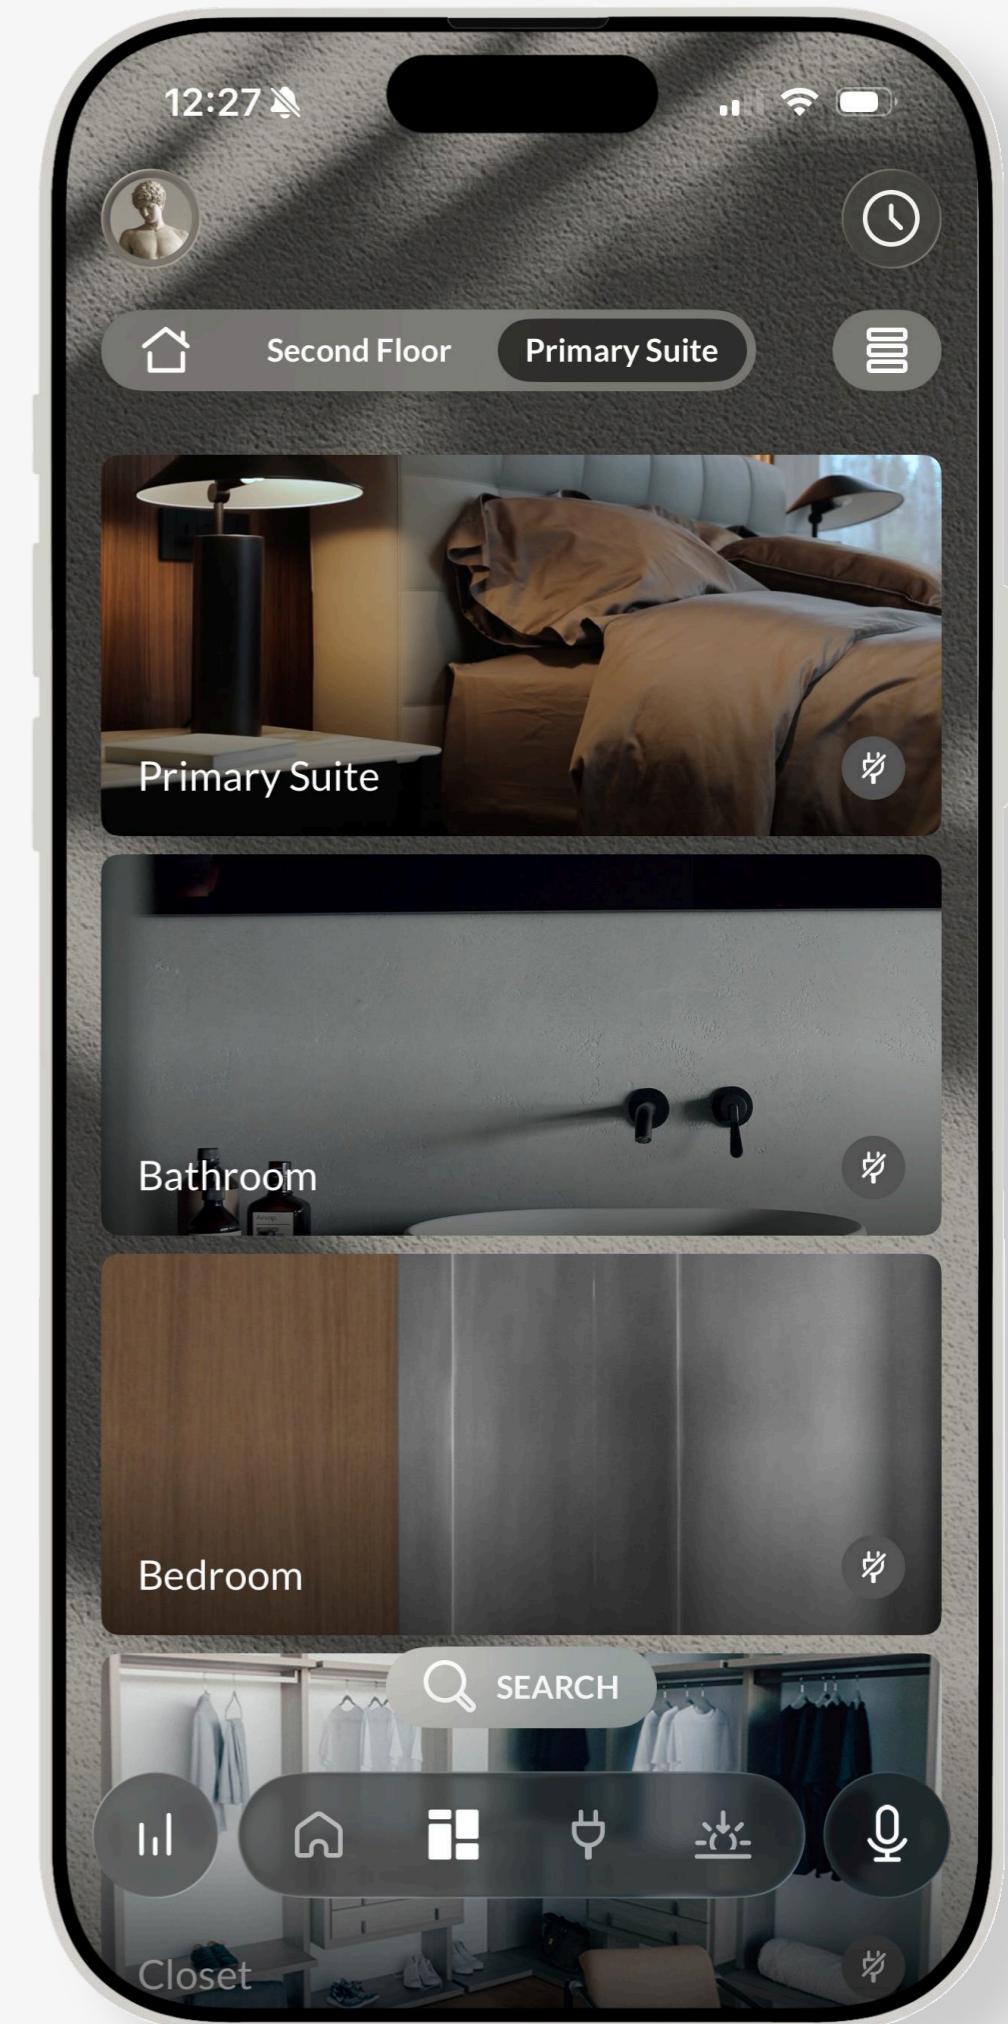

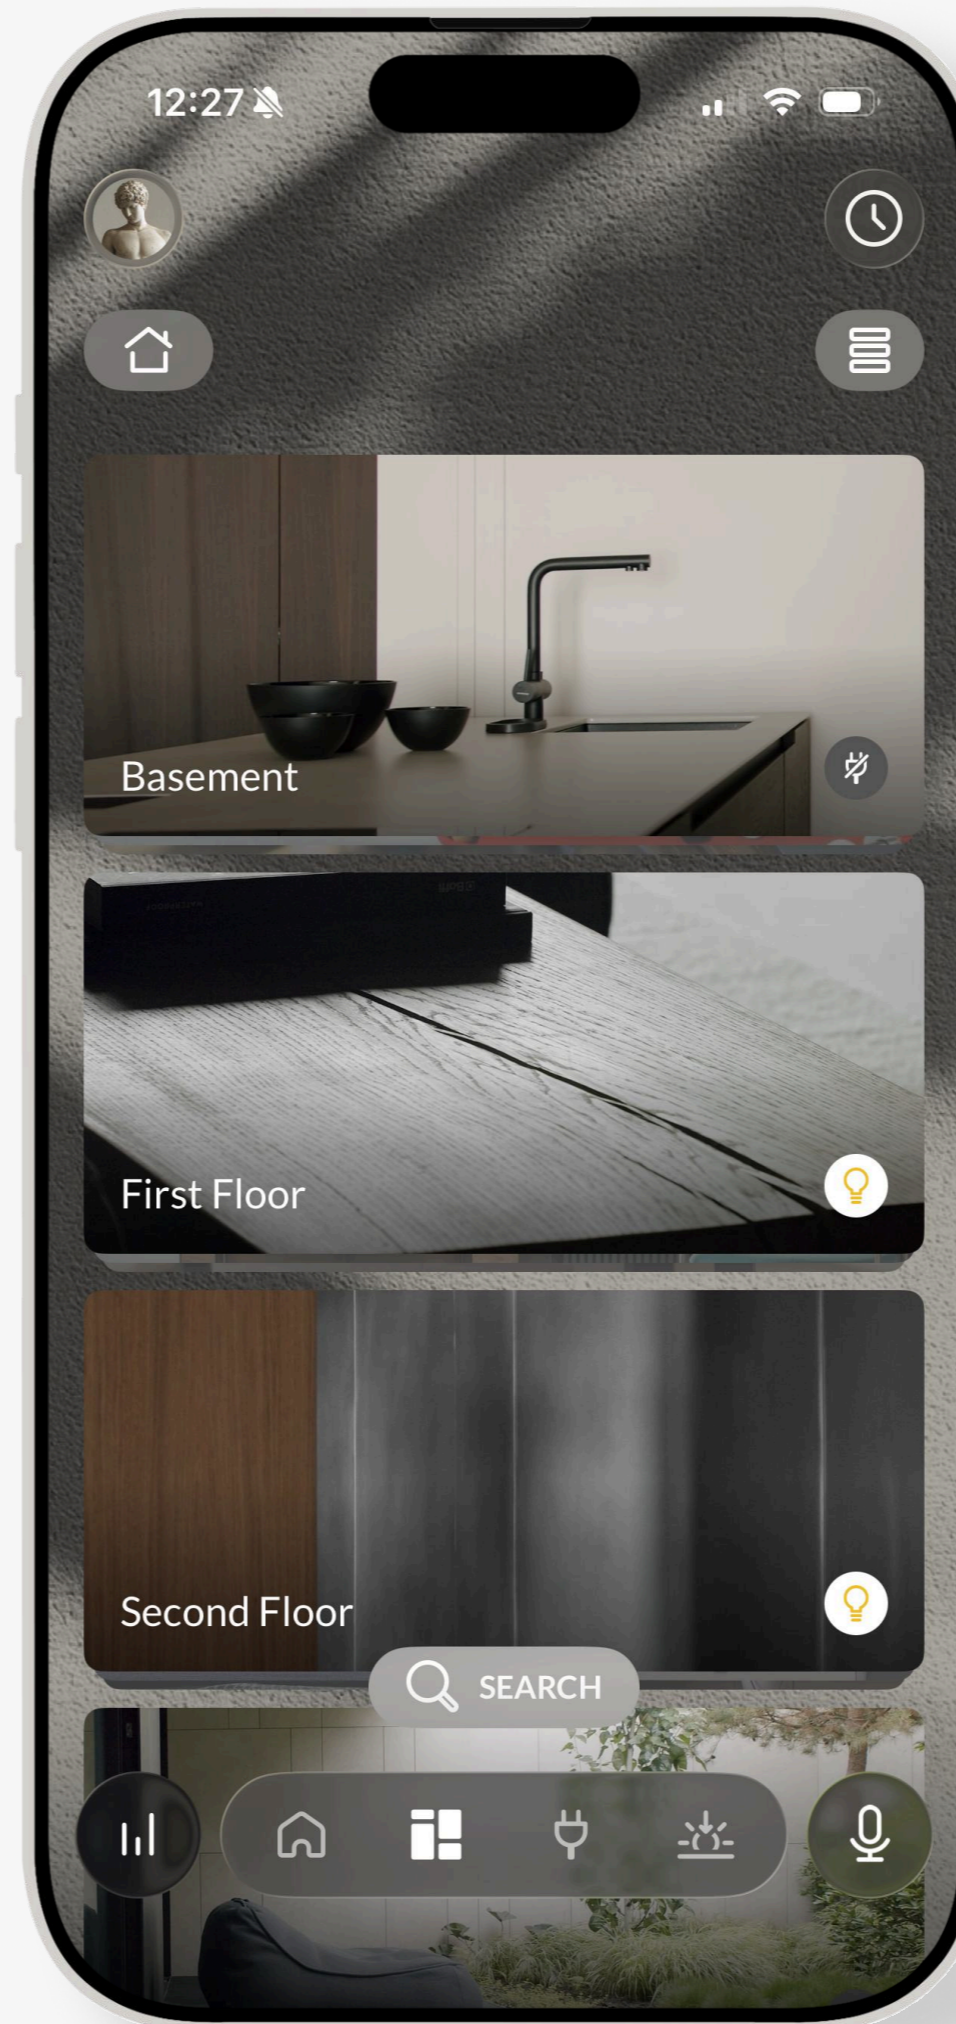

# AI X OS Areas

Tap the **Areas Tab** in the navigation bar to navigate directly to any room or area.

Collapse and expand floors or areas.

**Control** a specific area's lights, shades, or music volume with room-level sliders.

**View and adjust** any device in a room by tapping on a tile to open its controller.

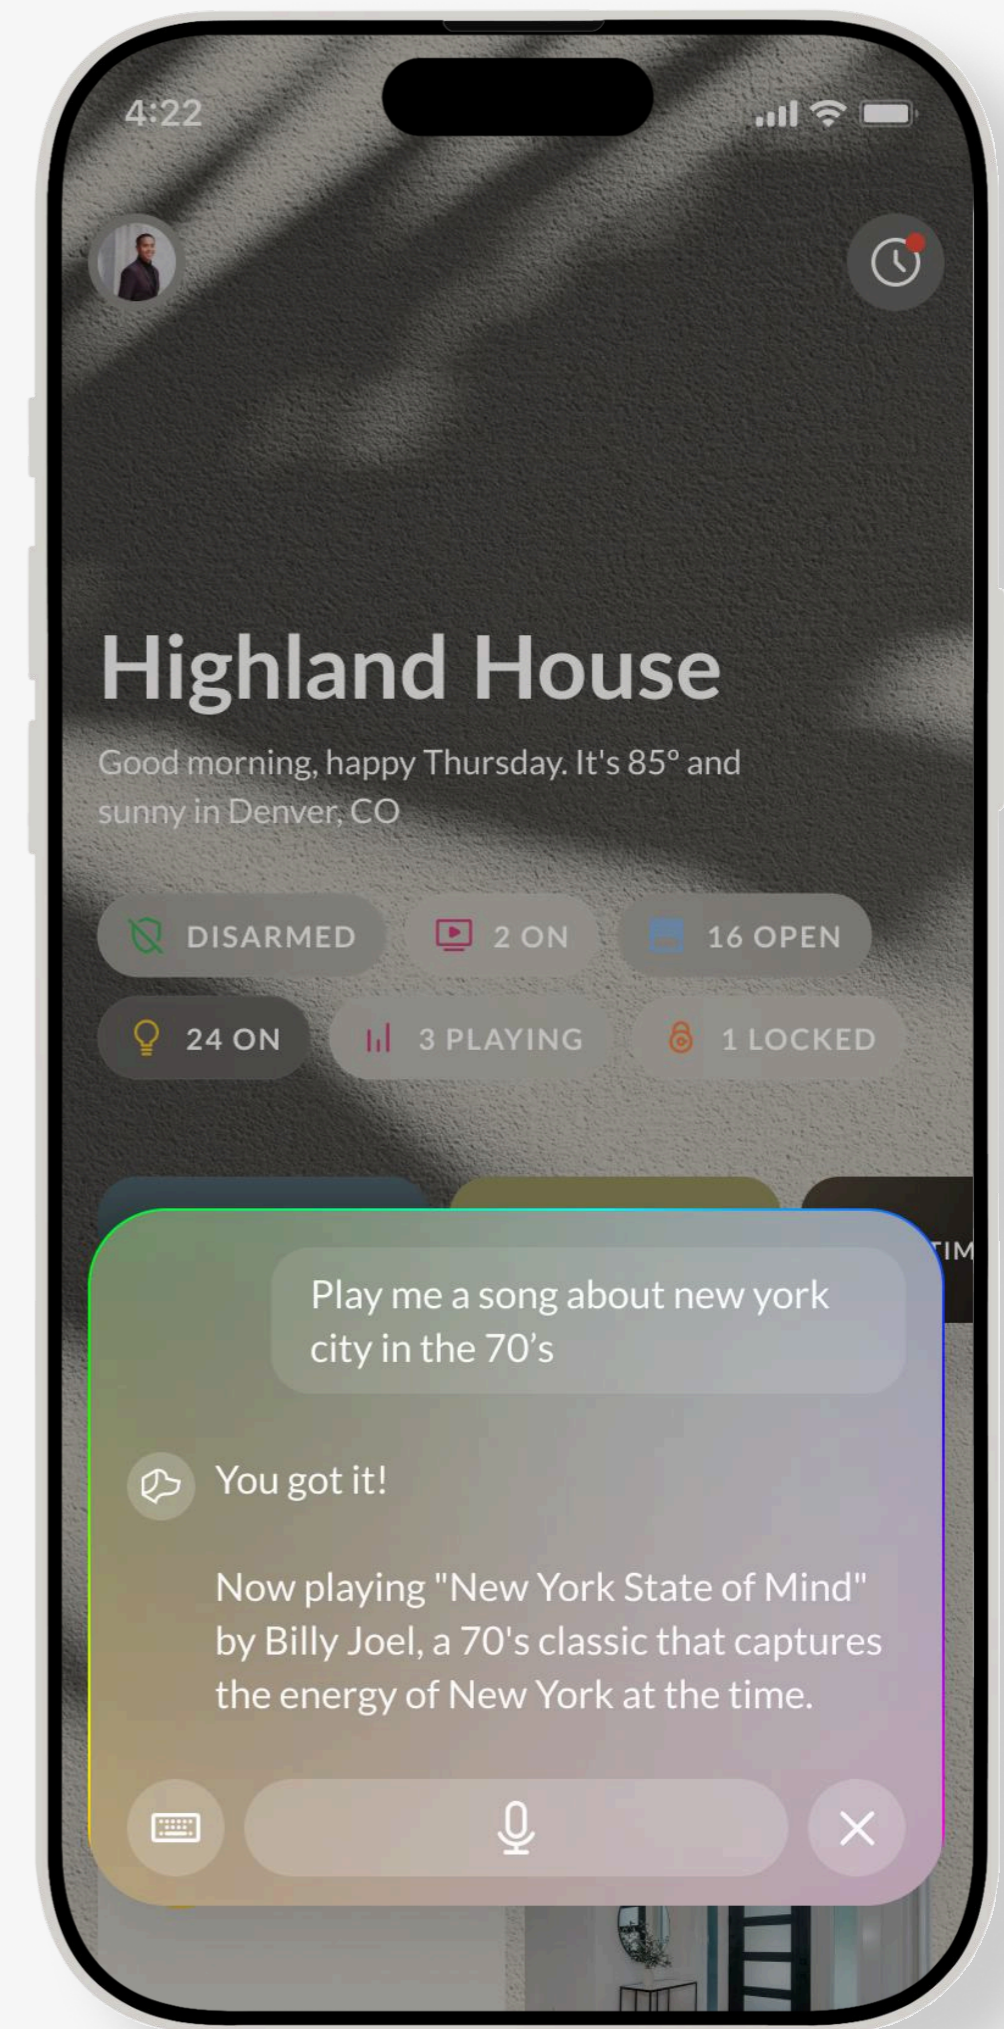

AI X OS

# Voice Control

**Follow along** as your command is transcribed to see how Josh is hearing you.

**Tap the Keyboard Icon** to type a command instead of speaking it.

**Tap the Microphone Button** to issue another command, or the “x” to close the view.

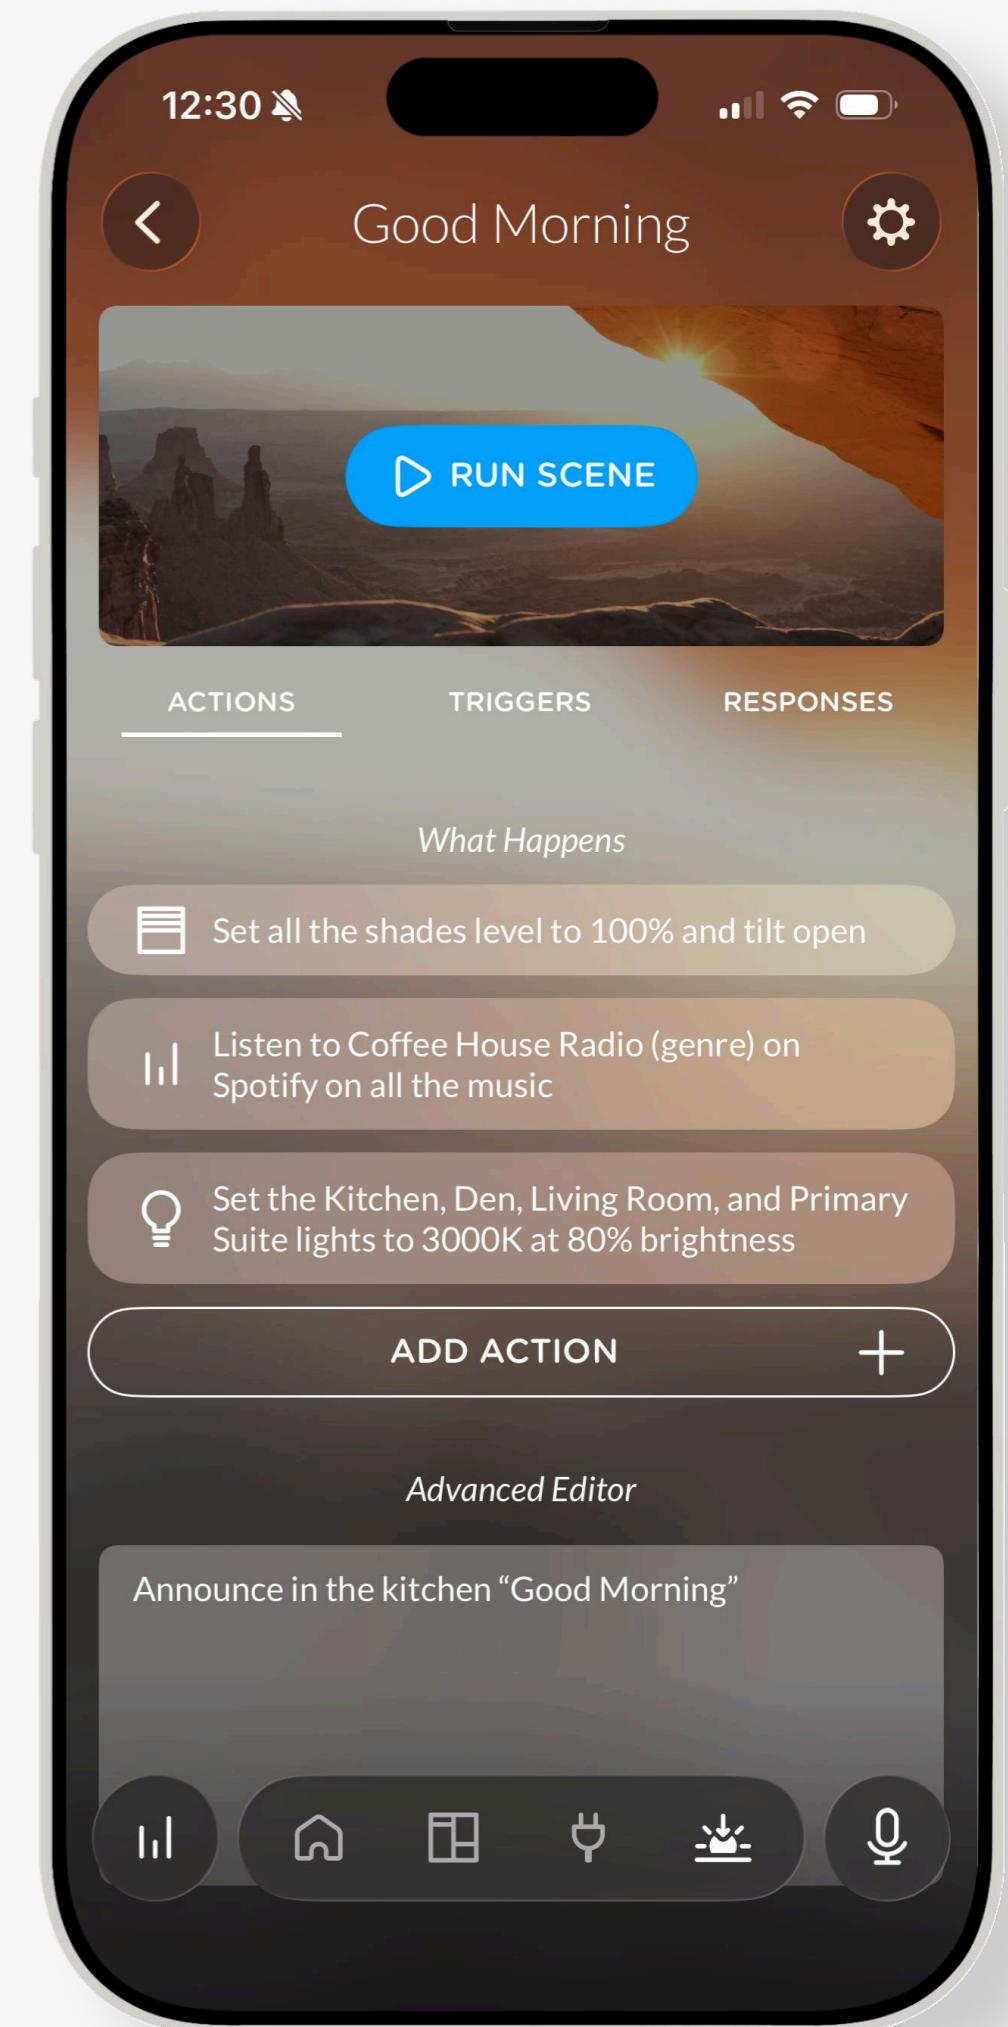

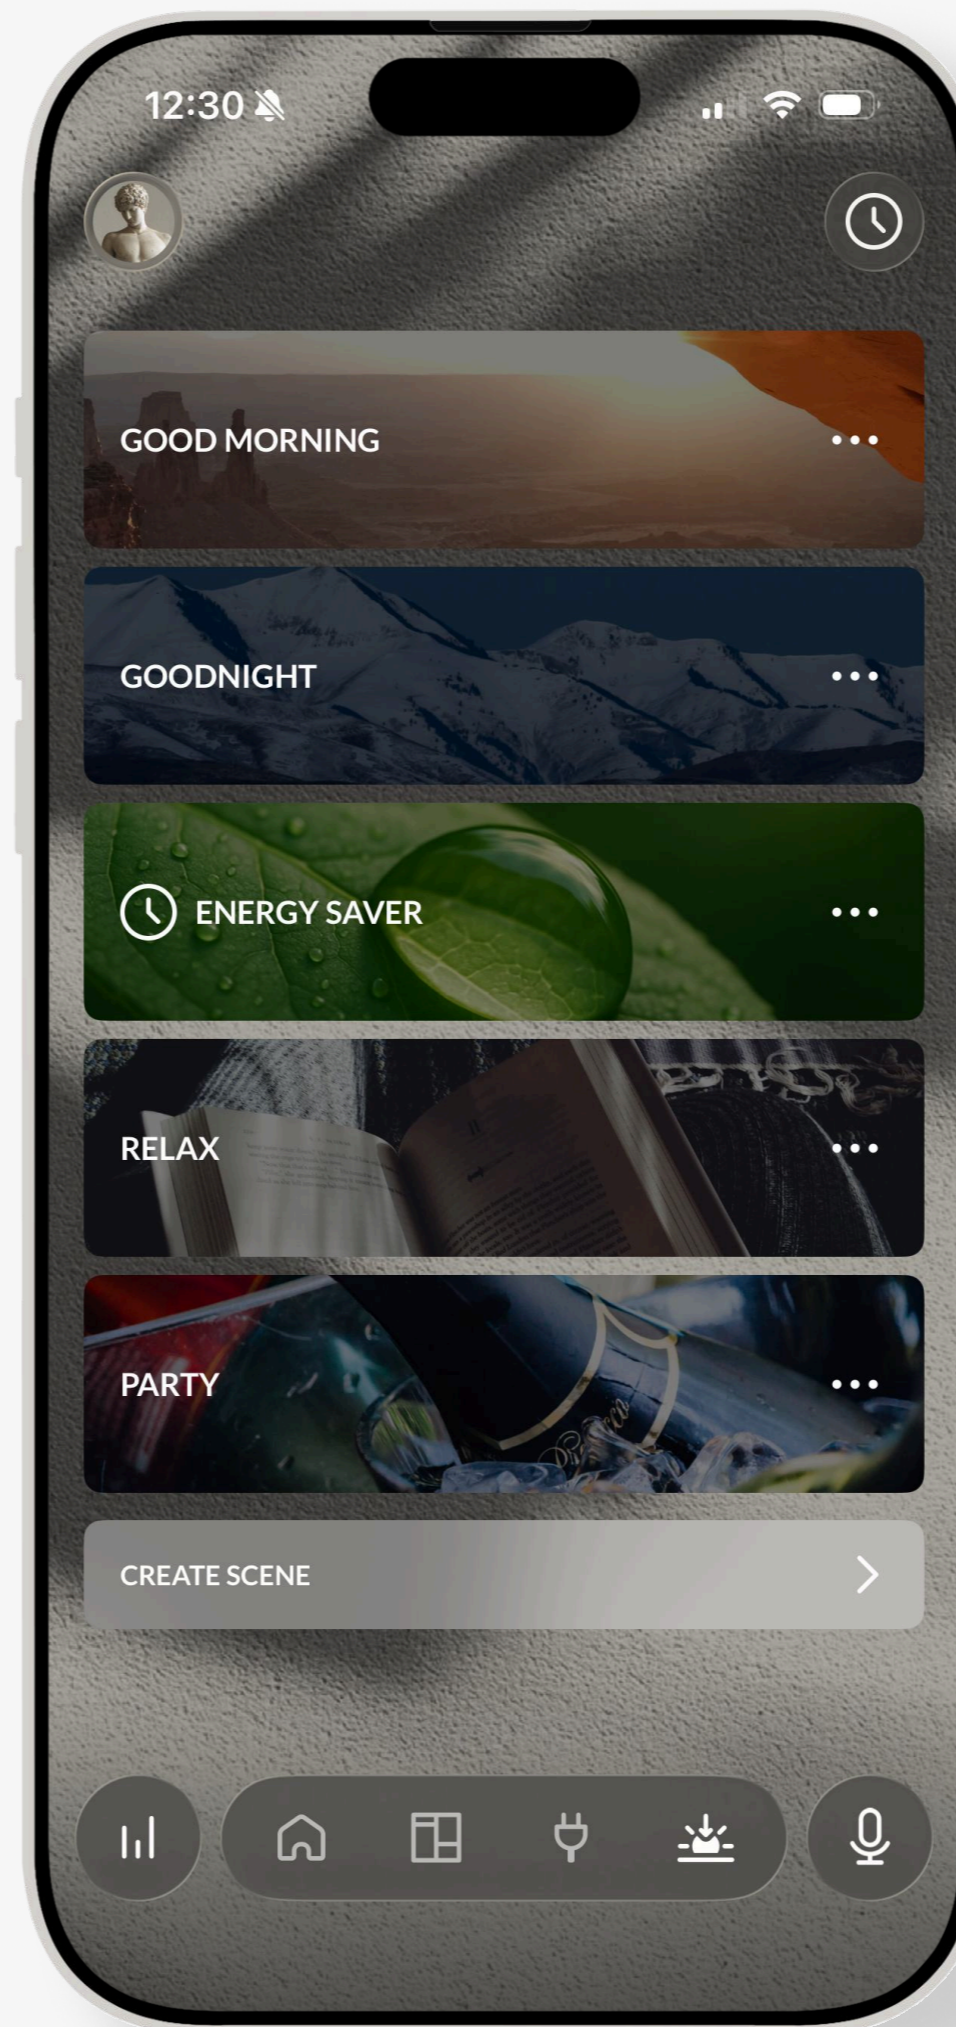

# AI X OS Scenes

Seamlessly control a collection of devices with one simple button press or voice command.

**Tap anywhere** on a Scene to activate it. Select the three little dots on the right to view and edit a Scene's actions.

**Build your own** by tapping **Create Scene**. If you do not know where to start, Josh recommends automations based on the devices and areas in your home.

AI X OS

# Music Control

Tap the Search Bar to find artists, songs, albums, playlists, or genres across your connected music services.

Browse your favorites, recently played content, and curated collections featuring new releases, popular genres, and more.

Tap the Now Playing Bar at the bottom of the screen to play, pause, skip tracks, adjust volume, shuffle music, and manage speaker groups throughout your home.

AI X OS

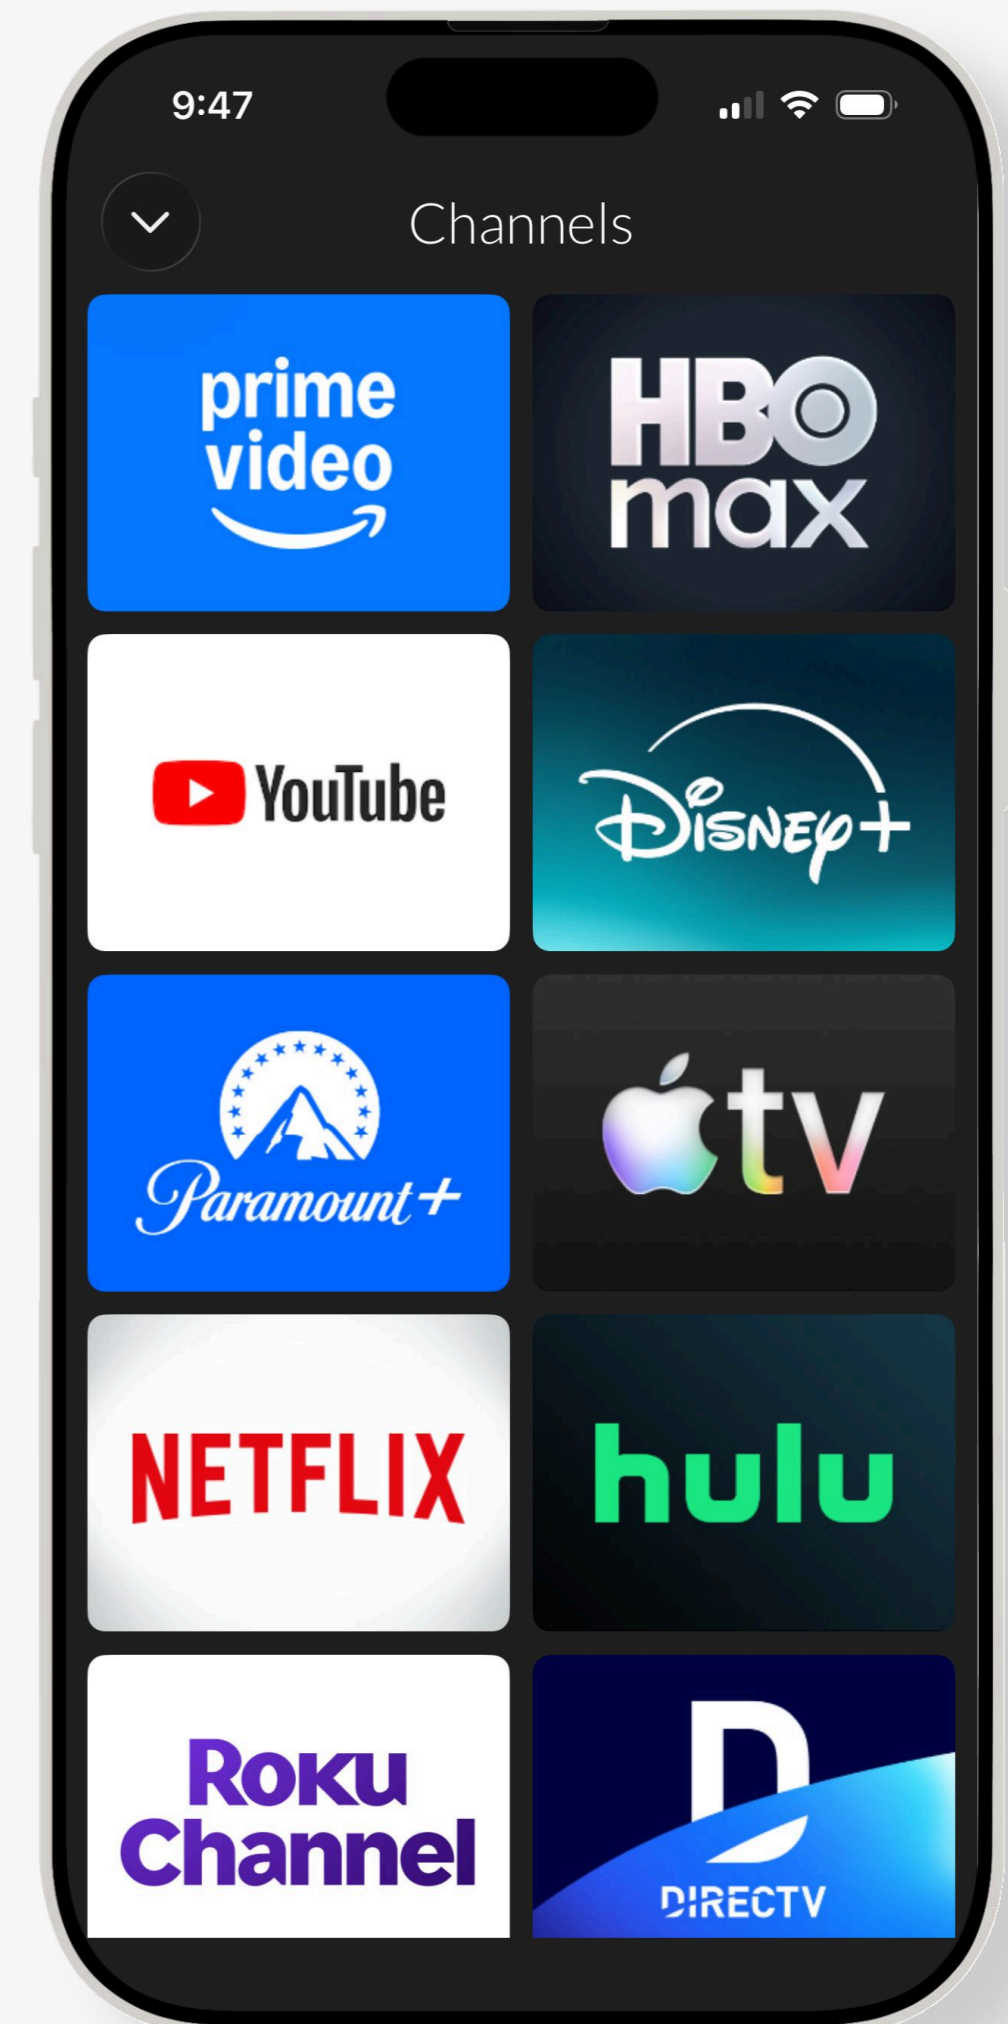

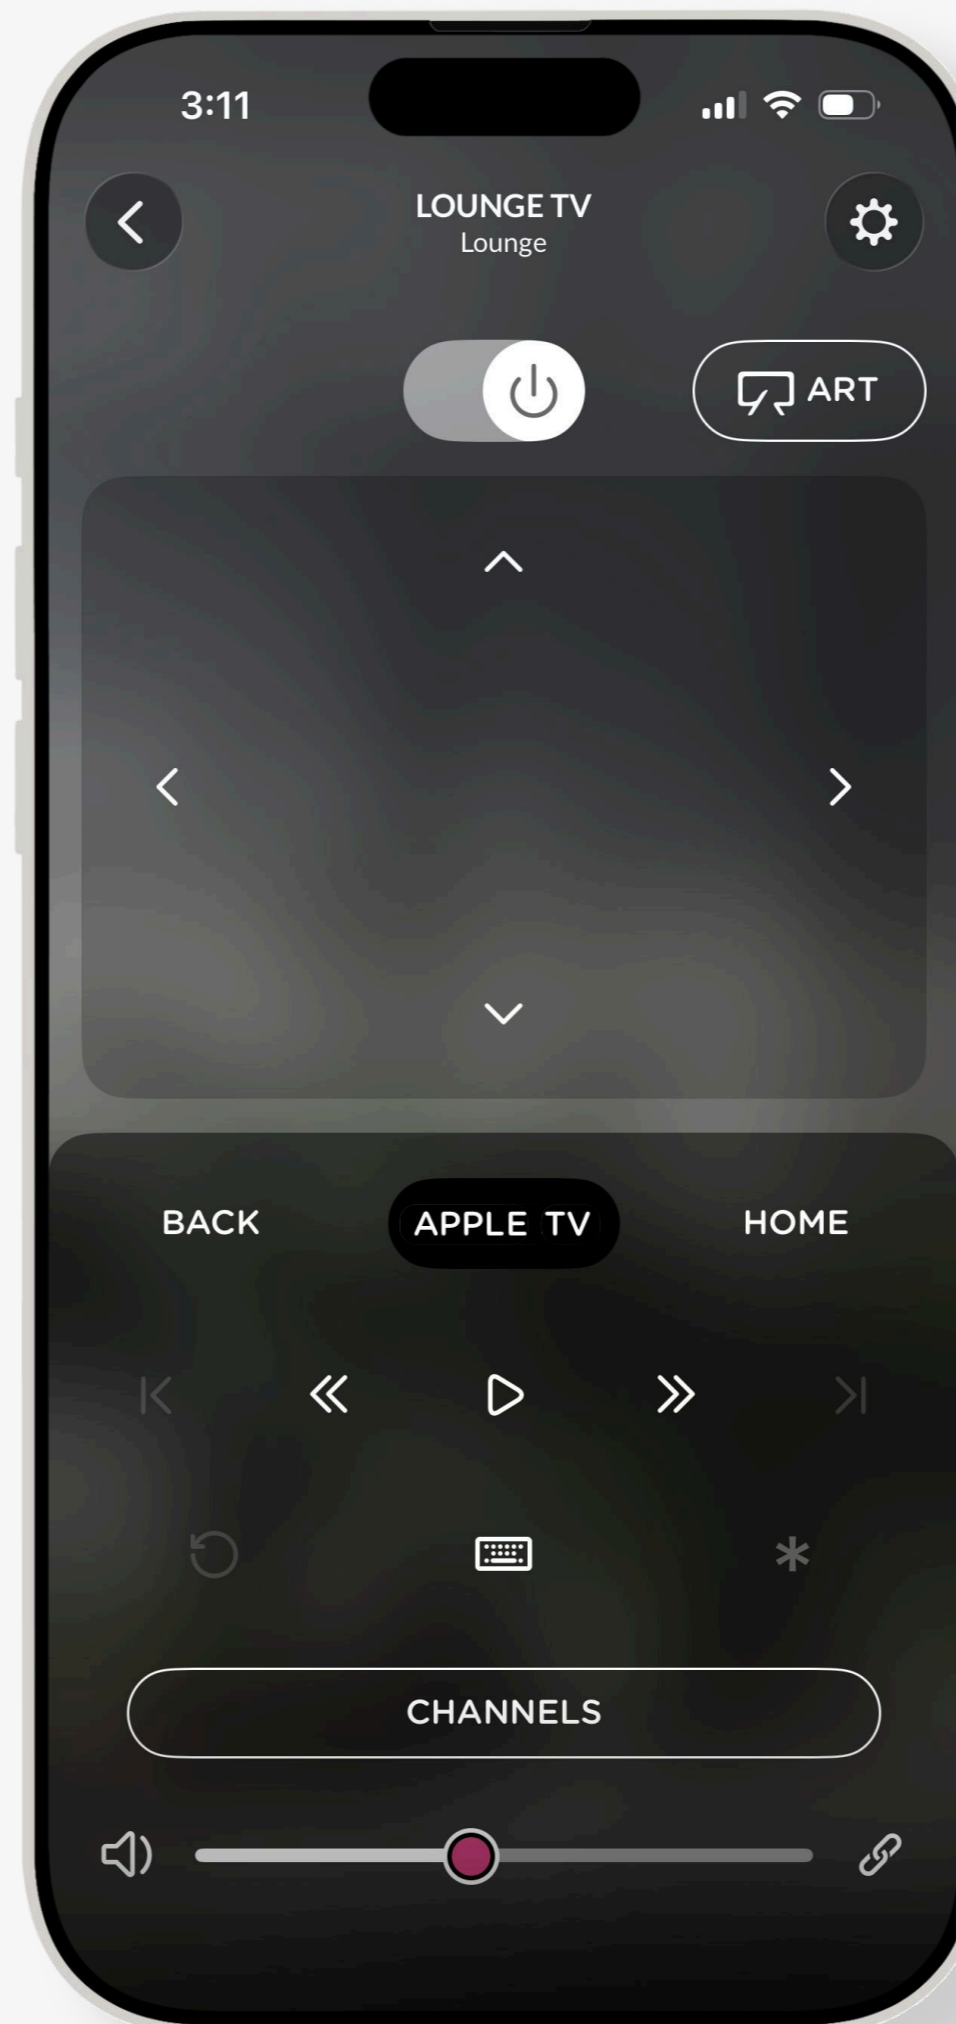

# Video Control

Navigate menus, adjust volume, change channels, and control playback whether you're streaming or watching live TV.

Tune into all of your favorite streaming services from one unified channel menu, making it easy to quickly access your favorite shows and movies.

# Device Control

Designed to be intuitive, each controller provides easy access to the devices you use every day.

**Adjust** lights, shades, climate, and more connected devices with a simple swipe of the unified slider. Additional controls enable you to turn devices on or off, fine-tune settings, and access more advanced options when needed.

**Customize** light brightness, color, temperature, and saturation to create the perfect atmosphere for any moment.
